

How to recycle your used vapes /e-cigarettes

Ask

Can you remove the battery from your vape/e cigarette? If not, Place the whole unit in a clear bag and put out for kerbside collection on top of or at the side of your recycling box.

Recycle it

If you can, place the separated batteries into a purple battery bag, then the remainder of the unit into a clear plastic bag then place both bags on top of or at the side of your recycling container for kerbside collection. Please do not place in any other recycling containers.

Household waste and recycling centres (HWRC)

You can also recycle your vapes/e cigarettes at the local HWRC. Batteries will go into the battery container and the units will go into small domestic appliance containers.

To obtain purple battery bags or for any further information please contact
