 The LA has two options for approved hosting arrangements: Self-hosting (on premise) in schools - option A. SIMS connected service, provided by ESS Cloud - option B. Approved hosting arrangements need to be in place by 31st December 2023. The change of hosting arrangements will lead to a new Saas contract for three years. There are annual service charges associated with the SIMS Connected Service. There are other LAs and schools across Wales/England who are in a similar position. Potential for future procurement around MIS for schools in Wales MIS contracts for schools in Wales changed from 12 to 36 months, an opportunity has bee identified to consider the available MIS in Wales and the opportunity to secure the best commerciterms to support our working arrangements with a potential MIS provider. To support this work, two work programmes have been initiated. A discovery project (nor concluded by the CDPS) and a procurement project (ongoing by WLGA). The discovery project resulted in three options: Do nothing - we could stay with ESS and the existing contract arrangement will allow the product to migrate to 'Next Gen' naturally. Develop a public sector owned MIS for schools based on the Teacher Centre product from Ceredigion Council. However, this may not be a viable option for councils in the short the medium term. The Teacher Centre system is currently primary only and would not scale to a Wales without significant investment. Plan now for an open market procurement exercise to provide the best commercial terms and to meet the needs of the school sector. Existing ESS contracts are set to expire (2025/2026 In addition to SIMS EES, two further products were identified from potential vendors: Arbo and Bromcom. Special Tuition and EOTAS Clawbacks Sue Walker expl	0	Discussion/Action			
 Changes to contracts and SIMS hosting ESS SIMS have issued notice to LA/Schools on permitted SIMS database hosting arrangements:		MIS/SIMS in Schools and Wales (redacted)

6.	Schoo	l Balances
		a Lewis presented a report on school balances as at 31 st March 2023 and highlighted the
		ing key points:
	•	Cumulative school balances as at 31 st March 2023, stand at £3,878,968. Unlike in the previous
		wo years, there were no late grants received and so the balance does not require adjustment.
		This compares to the previous year balance of £6,339,355 or £3,646,167 when excluding late
		grants.
		Fhe aggregated overall school balances decreased from 14.93% of formula funding to 9.1% but
		remains above the LA benchmark target of 3%.
		The decreasing level of school balances appears to be replicated across Wales and is expected
		to worsen during 2023/2024 and over the following financial years.
		Schools in an Amber (7) and Red (1) risk category were identified; however, no schools were in
	;	a deficit position as at 31/03/23.
	• /	As at 31/03/23, 16 schools had surplus balances that exceeded the thresholds identified in the
		Excess Balances Clawback Policy.
	•	15 schools are projected to be at risk of deficit budgets over the period for the MTFP and work
	i	s being undertaken to ensure that a balanced budget can be set over the medium term.
	Meml	pers noted the report and thanked Joanna and the Governor Support Team for their work in
		orting schools with their budgets over a very difficult period.
	Suppe	a ting schools with their budgets over a very difficult period.
	Suo V	Valker informed members that a detailed budget report would be provided to the Secution
		Valker informed members that a detailed budget report would be provided to the Scrutiny

	PP:	We recently had CSC at a Scrutiny Committee Meeting and there was opportunity to ask these questions at that meeting.
	SW:	We expect the Minister to announce that there will be a review of middle organisations such as Estyn, Local Authorities and Regional Consortia and this may address any issues.
8.	Any ot	her business
	Lauren	ce Matuszczyk raised the following:
	8.01	Formula Allocation (Welsh) Welsh-medium schools receive an additional allocation for the Welsh Language. Should all schools now receive this as all schools are expected to provide a level of Welsh- medium education?
		(AL) This is something we could consider.
	8.02	<u>Formula Allocation (SEN)</u> On each school's formula allocation statement there is a bottom-line statement which shows the notional SEN funding. What is included in this figure and what relevance does this figure mean?
		(SW) We can consider this further and bring back to another meeting.
	8.03	 <u>Teachers Pay Award</u> When a cut was made to school budgets this year, we used the bottom-line figure and then reduced it by 3.01%. This means that the any pay award was not fully funded. (AL) We normally look at individual formula lines when considering how to reduce funding, but this wasn't done this year and the reduction was applied to the bottom line which may need to be reconsidered in future years However, as this was done after pay award and inflationary pressures were applied, these elements have been fully funded. All schools are expected to identify their own budget reductions corresponding to a 3% reduction in funding to ensure there is sufficient funding for the ongoing budget.
		KM: There are clearly different ways to look at this, thank you for clarifying the authority's position
	8.04	<u>Petition</u> A petition has been launched to ask the Welsh Government to discuss the impact of budget cuts to schools and the negative impact it will have on education provision. LM would circulate a link to the petition which was organised by a national group of school governors.
9.		leetings lowing meetings were agreed:
	 School Budget Forum - 19th September 2023 School Budget Forum Working Group - 10th October 2023
